Subject: Atlantic Avenue Water Main Replacement Project

Dear Resident,

Aquarion Water Company will be replacing approximately 1,200 feet of water main within Atlantic Avenue in Hull, MA. The project area will be from Stony Beach Road heading east past the second intersection of Gun Rock Avenue, in the vicinity of 137 Atlantic Avenue. Upon conclusion of the water main installation, the project area will be paved.

The contractor, F. Riley Construction Company will begin work early next week (week of April 18, 2011). They will be on site installing environmental controls in the work area, (hay barrels, silt fencing, silt sacks, etc.). They will also be saw cutting the roadway and beginning excavation and installation of the new water main. Aquarion Water Company will send you another project update at the end of April.

The contractor and the project team will work to limit your inconvenience during the project, but there will be delays traveling in the work area and noise generated from construction from 7:00 a.m. until 5:00 p.m. Monday through Friday. The contractor will be working directly with the Hull Police Department during this project for traffic control. The project is expected to last approximately 6 weeks. If you have children, please remind them to stay away from the construction area.

Your patience and cooperation are greatly appreciated. If you have any questions, please contact Ronit Goldstein at 781-740-6693 or [rgoldstein@aquarionwater.com](mailto:rgoldstein@aquarionwater.com) during regular business hours 8:00 a.m.- 4:30 p.m. After hours and weekends please call 1-800-928-3734.

Sincerely,

Robert Roland  
Director of Operations
