

Hull water mains to be improved

Aquarion Water Company will clean out water mains in Hull beginning September 21 and continuing throughout October, so we can ensure that you continue to receive the highest quality water.

Work will take place weekdays, beginning at the Hull town line and continuing toward Pemberton Point. Crews will post signs each day to indicate their work area.

During this time, you might notice some discoloration in your water. This discoloration results from the temporary disturbance of the water flow, which disrupts naturally occurring minerals that settle in water mains. If this occurs, run cold water from the bathtub tap until it is clear.

You may want to store tap water in the refrigerator ahead of time for drinking and cooking. And, if your water is discolored, delay washing clothes until it is clear.

We appreciate your understanding and patience. For questions, please call Aquarion's Customer Service Department at (800) 928-3734.
