Aquarion Water Company To Begin Millbury Water Tank Rehabilitation Project

MILLBURY, MA. – March 6, 2017 – Aquarion Water Company today announced a water tank rehabilitation project in Millbury. Scheduled to begin on March 20, 2017, the work is expected to be completed by early May. The project will require Aquarion to take the Millbury water tank out of service for the duration of this work.

When the project commences, Aquarion will utilize its water interconnections with the City of Worcester for fire protection service. Aquarion’s wells, supported by temporary storage, will continue to supply water to customers.

During this project, customers may experience periods of low pressure or discolored water. Aquarion recommends customers store water in their refrigerators for drinking and cooking in case these circumstances arise.

Aquarion is also requesting customers to refrain from outdoor water usage once the project begins. “We greatly appreciate residents’ patience during this infrastructure improvement project,” said Francis King, Aquarion’s Operations Manager. “We will work closely with our customers, contractors, and town officials to coordinate the work and minimize disruptions.”

If your water service is impacted by the project, or if you have additional questions, please contact Francis King at 508-865-3998 or fking@aquarionwater.com.

About Aquarion Water Company of Massachusetts:

Aquarion Water Company of Massachusetts is the public water supply company for more than 50,000 people in the towns of Hingham, Hull, North Cohasset, Millbury, and Oxford. Aquarion Water Company is the largest investor-owned water utility in New England, and it has been in the public water supply business since 1857.

Across its operations, Aquarion strives to act as a responsible steward of the environment and to assist the communities it serves in promoting sustainable practices.
