Aquarion improving water lines in Simsbury

Aquarion Water Company will be cleaning water lines in Simsbury through Friday, Oct. 29, to ensure that its customers continue to receive the highest quality water the company can deliver.

These operations may result in temporary discoloration of the water, which is caused by the disturbance of naturally occurring minerals that settle in water mains over time.

During this period, Aquarion advises customers to check their water before using it and, if it is discolored, wait until the water is clear. Customers also may want to store tap water in the refrigerator for drinking and cooking.

To learn where Aquarion's crew will be working on a particular day, call 1-800-203-7000. For other questions, call the company's Customer Service Department at (800) 732-9678.

Aquarion Water Company serves approximately 580,000 people in 39 communities throughout Connecticut. It is among the seven largest investor-owned water utility companies in the U.S., and the largest in New England.
